

Doctors Are Not Gods: A Patient's Guide to Medical Myths and Misconceptions

By Dr. Robert Wachter

In the United States, we have one of the most advanced medical systems in the world. But even with all of our technology and expertise, there are still many myths and misconceptions about medical care.

One of the most common myths is that doctors are gods. We are not. We are human beings, and we make mistakes. We can't always predict what will happen, and we can't always cure every disease.

Doctors are not gods: Taking responsibility for our own health and wellbeing (The Wabi Sabi Series)

Another common myth is that medical care is always the best option. This is not always true. Sometimes, the best course of action is to do nothing. And sometimes, the best medical care is not available to everyone.

These are just a few of the many myths and misconceptions about medical care. In this book, Dr. Robert Wachter provides a clear and concise guide to the medical system. He debunks common myths and misconceptions, and he provides patients with the information they need to make informed decisions about their health care.

What You'll Learn in This Book

- The truth about medical miracles
- The role of luck in medical care
- The limits of medical technology
- How to choose the right doctor
- How to get the most out of your medical care

Who Should Read This Book?

This book is a must-read for anyone who wants to understand the realities of medical care. It is especially helpful for patients who are facing a difficult diagnosis or who are making decisions about their treatment options.

If you are a patient, this book will help you to:

- Understand your medical condition
- Make informed decisions about your treatment options
- Get the most out of your medical care

If you are a loved one of a patient, this book will help you to:

- Understand your loved one's medical condition

- Support your loved one through their treatment
- Make informed decisions about your loved one's care

If you are a healthcare professional, this book will help you to:

- Understand the needs of your patients
- Communicate with your patients in a clear and concise way
- Provide your patients with the best possible care
