Print length : 161 pages

As the demand for mobile data continues to grow, the need for high efficiency power amplifiers (PAs) in 5G transmitters has become increasingly important. This book provides a comprehensive overview of the design and implementation of high efficiency PAs for 28 GHz 5G transmitters.

Key Features

- Covers the latest advances in PA design for 28 GHz 5G transmitters
- Provides a comprehensive overview of PA design fundamentals
- Includes detailed design examples and case studies
- Written by leading experts in the field

Table of Contents

1. to Power Amplifiers
2. PA Design Fundamentals
3. High Efficiency PA Design for 28 GHz 5G Transmitters
4. Design Examples and Case Studies
- 5.

Audience

This book is intended for RF design engineers, system architects, and researchers who are interested in the design and implementation of high efficiency PAs for 28 GHz 5G transmitters.

About the Authors

The authors of this book are leading experts in the field of PA design. They have extensive experience in the design and implementation of high efficiency PAs for wireless communications systems.
