

# The Phonograph and National Culture in Spain, 1877–1914: Currents in Latin American Popular Music

The phonograph was invented in 1877 by Thomas Edison, and it quickly became a popular way to listen to music. In Spain, the phonograph was first introduced in 1888, and it quickly became a popular way to listen to music and to learn about other cultures. The phonograph played a major role in the development of national culture in Spain, and it helped to create a new soundscape in the country.

The phonograph was used to promote national identity and culture in Spain. The government used the phonograph to distribute recordings of patriotic songs and speeches, and it also used the phonograph to teach people about Spanish history and culture. The phonograph also helped to create a new sense of national unity. People from all over Spain could now listen to the same music and learn about the same history and culture.
