The Delta Methodology

The Delta Methodology focuses on identifying the "hot" and "cold" numbers within a given lottery game. Hot numbers are those that have appeared

more frequently than expected, while cold numbers are those that have appeared less frequently.

By analyzing historical data and applying complex algorithms, the Delta Methodology assigns a "Delta" value to each number, indicating its likelihood of being drawn in the next game. Players can then use these Delta values to prioritize their number selections.

The Shorlist Methodology

The Shorlist Methodology takes a different approach by identifying a reduced set of numbers (the "Shorlist") that have the highest probability of appearing in the next draw.

Using a combination of statistical analysis and pattern recognition, the Shorlist Methodology eliminates unlikely numbers and ranks the remaining numbers based on their potential for selection. This provides players with a more targeted selection process.
